1 General

1.1 Information about the instructions

The Installation Instructions describe the requirements for installing the product correctly and safely into the complete machine.

These Installation Instructions are a part of the product. The safety-relevant information should be taken over for the documentation of the complete machine.

With customer-specific project pumps (pump types which begin with "PL" or "PML"), there may be differences from the Installation Instructions.

1.2 Warnings

Warnings in the Installation Instructions are marked by the hazard symbol, the keywords, and the color. These features provide information about the extent of the hazard.

<table>
<thead>
<tr>
<th>Hazard Symbol</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>DANGER</td>
<td>Indicates a dangerous situation, which will directly cause death or serious injury if not prevented.</td>
</tr>
<tr>
<td>WARNING</td>
<td>Indicates a dangerous situation, which may cause death or serious injury if not prevented.</td>
</tr>
<tr>
<td>CAUTION</td>
<td>Indicates a dangerous situation, which may cause moderate or slight injuries if not prevented.</td>
</tr>
<tr>
<td>NOTICE</td>
<td>Indicates a situation, which may cause damage to property if not prevented.</td>
</tr>
</tbody>
</table>
1.3 Disclaimer
The manufacturer accepts no liability for damage or malfunctions that are caused by non-compliance with the Installation Instructions.
The manufacturer accepts no liability for damage or malfunctions that are caused by modifications to or conversions of the device or by improper handling.
The manufacturer accepts no liability for damage or malfunctions that are caused by using spare parts or accessories that are not approved by the manufacturer.

1.4 Manufacturer’s Address
KNF Flodos AG
Wassermatte 2
6210 Sursee, Switzerland
Phone +41 (0)41 925 00 25
Fax +41 (0)41 925 00 35
www.knf.com

1.5 Supporting documents
The listed documents must also be observed. The valid versions are available at www.knf.com/downloads.
- Data sheet
- 3D model

The following must also be observed:
- Local T&Cs
- Sales documents and agreement between KNF and the customer
2 Safety

2.1 Intended use
The pump is intended solely for the following uses:
- Transferring liquids and gases
- For operation in accordance with the operating parameters specified in the technical data of the supporting documents

2.2 Reasonably foreseeable misuse
The pump must not:
- be operated in an explosive atmosphere
- be used to transfer explosive media
- be used to transfer media whose compatibility with the pump head, valves, diaphragms, and seals has not been proven

2.3 Responsibility of the user
The user is responsible for ensuring that the safety precautions in these Installation Instructions are complied with. Applicable safety, accident prevention, and environmental protection regulations must be complied with.

2.4 Product-specific risks
Remaining risks that were determined in a risk assessment are described in this section. Safety precautions and warnings in this section and in the other sections of the Installation Instructions must be observed to prevent dangerous situations.

DANGER

Danger of injuries and damage to property due to dangerous substances
Poisoning and chemical burns or unintended reactions caused by leaking dangerous substances
- Observe the safety data sheets of the transferred media
- Before transferring a medium, check whether it can be transferred safely in the specific application case.
- Ensure that the system is not subject to any risks of explosion, also in extreme operating conditions (temperature, pressure) or in case of malfunctions.
- Ensure the pump is used only by suitably trained, skilled employees
- Clarify the wear resistance of the head material
- Check that the pump and the system do not leak at the operating temperature of the transferred medium
- Check the pump for damage regularly
- Operate the pump only when you are sure it has no technical malfunctions
- Operate the pump in accordance with the technical data
- Work on the pump or fluid circulation system only after they have been decontaminated and/or a decontamination declaration is present
DANGER

Danger of injuries and damage to property due to leaks at the interfaces to the pump head
Poisoning and chemical burns or unintended reactions caused by leaking dangerous substances
➢ Wear personal protective equipment
➢ Connect the pump correctly
➢ Operate the pump only when you are sure it has no technical malfunctions
➢ Operate the pump in accordance with the technical data

DANGER

Danger of injuries and damage to property due to uncontrolled flow while the pump is not in operation
Poisoning and chemical burns or unintended reactions caused by leaking dangerous substances
➢ Construct the fluid system so that the operating pressure at the pressure side of the pump is higher than at the suction side
➢ Install a shut-off valve in the fluid circulation system
3 Installation

⚠️ WARNING

Danger from incorrect installation
Injuries or damage to property from leaking media
➢ After installation, check the system for leaks with a safe medium
➢ Observe the requirements for intended use
➢ Take precautions in the design of the end device so that leaking liquids cannot come into contact with live components

The following requirements apply to all activities described in this section:

3.1 Installation location
The installation location must:
▪ protect the pump against immersion
▪ keep aggressive and flammable liquids and vapors away
▪ allow hoses to be connected without tensile or bending stress
▪ take account of cooling the pump drive
▪ ensure that any leaks can be handled
▪ have appropriate precautions if flammable media are used

3.2 Mechanical mounting
▪ Protect the product against impacts, knocks, and strong vibrations
▪ For dimensions, installation positions, fluid connections, please refer to the product data sheet

3.3 Connecting the fluid system
Use suitable means to check the fluid connection for leaks.
For more information regarding dimensions, please refer to the data sheet.
3.4 Electrical connection

For terminal assignment, output data, and control requirements, please refer to the data sheet.

Observe the regulatory requirements for electrical installations:

- Overload protection and separating protective devices
- Contact protection and additional insulation
- Ground connections
- Protection against vibrations, tensile stress, and corrosion
4 Initial start-up

The product must not be started up until it has been ensured that the machine in which the product is to be installed meets the requirements of the Machinery Directive 2006/42/EC, if applicable.

⚠ WARNING

Danger that the fluid system could rupture due to excess pressure
The pump builds up pressure. With a closed system, the max. permitted operating pressure can be exceeded. This may cause injuries to personnel or damage to the pump or the system.
- Prevent operation against a closed system
- In the case of parts that are in contact with the fluid, use only those that are designed to at least withstand the operating pressure of the pump
- If necessary, take suitable measures to limit the maximum system pressure

⚠ CAUTION

Danger of unexpected chemical reactions with water
Residues of water in the pump that come from testing in the factory may react with the transferred medium.
- Before starting the pump for the first time, rinse it with a medium that is uncritical as regards water

⚠ CAUTION

Danger due to automatic start
Pumps with brushless DC motors have a thermal fuse that stops the motor if it overheats. When the motor cools, it starts again automatically.
- Ensure that no dangerous situations can result from this.

⚠ CAUTION

Danger from hot surfaces
The pump becomes hot during operation. Burns from hot surfaces or injuries from uncontrolled movements are possible.
- Do not touch the pump while it is operating.
- Ensure a sufficient supply of cool air and keep a safe distance between the pump and neighboring components.
- Operate the pump in accordance with the technical data.
- If the temperature of the medium is above 50°C, take precautions to prevent burns from fluid components.

Before switching on the pump, check the following points:
- All hoses are attached properly
- Pump is mechanically fixed in place
- Specifications of the power supply correspond with the data on the pump’s type plate
- Pump discharge is not blocked
- All cables are attached properly
- Contact protection for electrical connections and moving parts is installed
5 Maintenance

Ask your KNF representative about the availability of spare parts for this product.

6 Rectifying transfer problems

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Cause</th>
<th>Remedy</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pump does not work, no movement or sounds detectable</td>
<td>No or incorrect control</td>
<td>Check that voltage and signal form comply with the specification</td>
</tr>
<tr>
<td>Pump does not work, drive becomes very hot</td>
<td>Motor is controlled with an incorrect signal</td>
<td>Check that voltage and signal form comply with the specification</td>
</tr>

</tbody>
</table>

If the malfunction cannot be rectified, contact your local KNF representative (www.knf.com)
7 Returning the pump

1. Rinse the pump to remove dangerous and aggressive liquids from the pump head.
2. Remove the pump.
3. Send the pump with completed decontamination declaration (see www.knf.com/download) to KNF.
